

FORM AR-01 APPLICABLE REQUIREMENTS & COMPLIANCE PLAN - BY EMISSION UNIT

(567 IAC 22.105(2)"d"; 567 IAC 22.203(2)"e")

- 1) Emission Unit Number: _____
- 2) Brief Description of Emission Unit Process: _____

- 3) List all air quality rules, regulations and existing permits that apply to the emission unit listed and described above:

Item #	Rule or Regulation Name and Description (list each requirement separately e.g. emission limit, recordkeeping, performance testing)	Citation (e.g. 40 CFR 60 subpart Dc, Permit 92-A-345)
a		
b		
c		
d		
e		

- 4) List each operating and/or emission limit specified in the requirements listed in #3:

- 5) If the emission unit will be **monitored**, specify what will be monitored and the frequency of the monitoring. For example, you could monitor particulate matter emissions from an asphalt plant by monitoring the pressure drop gauge of the baghouse once each operating day.

Emission Point No.	Control Equipment No. (if applicable)	Indicate what will be monitored	Monitoring frequency

6) List what **records** will be kept and the frequency of record keeping for this Emission Unit:

Indicate WHAT will be recorded	Record keeping frequency

7) Indicate if **performance tests** have been or will be conducted on this emission unit. For performance tests specify the test method and the frequency that they will be performed.

Item from #3	Pollutants tested	Test method used	Testing frequency

8) Outline the **reporting** that will be done for this Emission Unit:

Item from #3	Indicate WHAT will be reported	Frequency of reporting

9) **COMPLETE FORM AR-01 FOR EACH EMISSION UNIT OR FORM AR-02 FOR EACH APPLICABLE REQUIREMENT.**
